CHIPS

Chips revisits the logic of terrazzo: different fragments that come together to create a shared identity. Its clean, balanced pattern adds texture, depth and movement, while colour connects the collection with botanical landscapes, Mediterranean earth, water, sky and minerals. Conceived as a linking material, it harmonises with other surfaces and helps to articulate coherent projects without sacrificing expression. It can complement other materials or take centre stage, always adding nuance to the overall scheme. Chips turns terrazzo into a creative tool for connecting, organising and bringing contemporary architecture to life.

Chips recupera la lógica del terrazo: fragmentos distintos que, al reunirse, construyen una identidad común. Su gráfica limpia y equilibrada aporta textura, profundidad y movimiento, mientras el color conecta la colección con paisajes vegetales, tierras mediterráneas, agua, cielo y minerales. Concebida como un material de enlace, armoniza con otras superficies y permite articular proyectos coherentes sin renunciar a la expresividad. Puede acompañar a otros materiales o asumir un papel protagonista, siempre sumando matices al conjunto. Chips convierte el terrazo en una herramienta creativa para unir, ordenar y dar vida a la arquitectura contemporánea.
